Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-24 in the reply filed on 09 December 2004 is acknowledged.
2. Claims 25-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 09 December 2004.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,797,878 to Santini, Jr. et al. (hereinafter "Santini") in view of U.S. Patent No. 6,071,819 to Tai et al. (hereinafter "Tai").

Santini shows a microchip device array having two or more microchip device elements, each having a plurality of reservoirs, reservoir caps, means for wirelessly communicating, a photocell, energy storage means and a chemical sensor. See Figures 1-7. Santini, however, does not show a means for flexibly connecting the device elements. Tai discloses microchip elements on a flexible substrate. See Figures 2 A-C and 3 A-H. See also cols. 2-7. It would have been obvious to one of ordinary skill in the art to modify the invention of Santini by flexibly

connecting the microchip elements, as suggested by Tai, in order to allow the array to conform to the curvatures of the body thereby maximizing contact between the device and body.
